

# SECUREBAR™

---

## SecureBar™

The SecureBar™ is the most versatile option for light truck and passenger vehicles, including pickups, SUVs and passenger cars. The SecureBar™ is extra reliable, with its durable square tubing for added strength and soft rubber feet to provide excellent grip and prevent marking surfaces. It can be hung both horizontally and vertically on standard peg hooks, and is easy to use with its positive locking lever action and quick thumb release. Plus, it is Zinc-plated for rust protection -- never fear the rainy days. Keep it secure with the SecureBar™.

### Versatility Plus Strength

Durable square tubing provides added strength. Can be used in pickups, SUVs, vans and passenger cars.

### Soft Rubber Feet Grip

The soft rubber feet provide excellent grip and won't mar surfaces. Choose between a large-end rubber foot or small-end rubber foot.

### Easy Operation With Locking Lever

For an easy operation you can depend on the locking lever action and quick thumb release. Adjusts continuously from 44" to 78".

### Zinc Plated

You don't need to worry about rust when it comes to the SecureBar... Zinc plated, it is "secure" from all rust. No need to worry if it is exposed to rain or water.
