

QUIKBINDER™ LOCK

When you want safety and security for your cargo, all you need is the Quikbinder™ Lock. This long shank brass combination padlock is designed for use with the QUIKBINDER PLUS™ to keep the ratchet binder in its tightened, immobilized position to avoid tampering or theft when left unattended. The Quikbinder™ Lock is weather-proof and designed to be easy to use. Simply set your desired combination using the set up key and you're ready to go.

Security for your Quikbinder

This Quikbinder Lock pairs with the QuikBinder Plus™ for load securement. It can be inserted to keep the ratchet binder in its tightened, immobilized position to prevent tampering with the load or theft of binder and chain. This lock can also be used in many other application.

Hassle-Free Combination Keys

No need to carry around this lock's key for locking and unlocking - the combination keys make things simple and hassle-free. The Quikbinder Lock does come with a small key, however - it is only needed if you ever want or need to reset your combination code.

Inset and Protected Combination Keys

The Quikbinder Lock was thoughtfully made with an inset to protect the combination keys from rubbing against hard surfaces and from moisture when set down.

Long Length Shank

The lock's extra long shank is purposefully made for locking around those larger applications such as the Quikbinder. Where you require that extra reach length, this lock will do the trick. The lock is also available with a shorter shank.

Weather Proof and Corrosion Resistant

Wherever you go this lock can come along. With its weather proof and corrosion resistant brass body, this lock will maintain its durability and keep your Quikbinder safe and secure.
